

Schlumberger

Redraw the Lines of Possibility

Technology4.0 Careers

careers.slb.com

A close-up portrait of a male Schlumberger employee. He is wearing a white hard hat with the company name "Schlumberger" printed on it in blue. He is also wearing clear safety glasses with black frames and a black strap. He has a beard and is smiling. He is wearing a blue collared shirt with white shoulder patches. The background is blurred, showing what appears to be an industrial or construction site.

Schlumberger

Technology4.0

Design, Develop, and Deploy
the Technology of Tomorrow

Join our digital, technology lifecycle management, engineering and manufacturing teams in revolutionizing the industry and unlocking the power of technology.

Digital Technology

Leverage the cloud, machine learning, data analytics, and cybersecurity to drive our industry's digital transformation.

Engineering

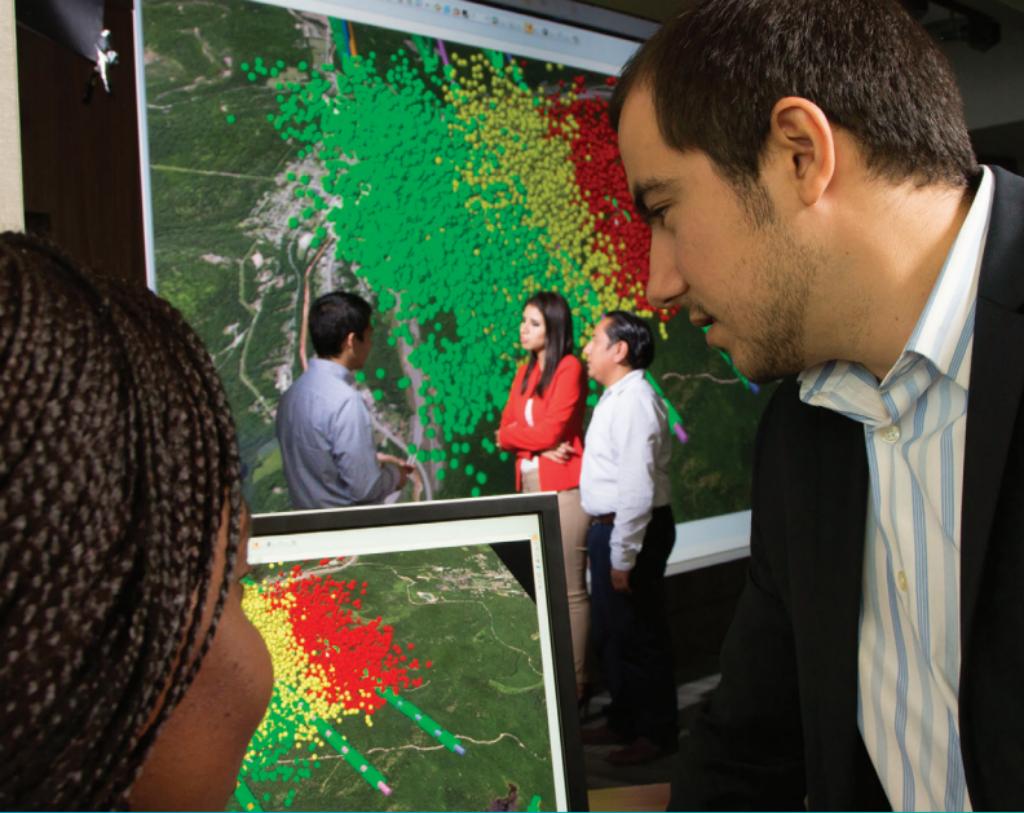

Drive innovation in areas such as reliability management, mechanics, materials and modeling, sensors, electronics, and robotics.

Manufacturing

Bring groundbreaking products to life with precision, flexibility, and state-of-the-art tools and processes.

Technology Lifecycle Management

Fuel our continuous innovation loop as you explore the intersections of data science, maintenance, and operations.

Collaborate

Explore and contribute.

As a member of our dynamic squad, work directly with a global network of multidisciplinary experts driving our industry's digital transformation.

Innovate

Create and design.

Hit the ground running in a productive environment where you develop industry-changing digital solutions.

Accelerate Change

Develop and deploy.

Help our customers achieve something better. From Day One, immerse yourself in a culture that tackles tough challenges and delivers solutions in a continuous DevOps loop.

Make Your Impact

Rack Up Unmatched Expertise

Excel at problem-solving, analyze data to your heart's content, and craft solutions from start to finish.

Drive Digital, Data-Based Solutions

Play a key role in developing integrated systems and automated solutions that shape the future of a dynamic global industry.

What You'll Find

Growth Potential

At Schlumberger, there are no limits to what you can achieve. Our technology development teams have an insatiable appetite for innovation, and we help them explore their passions through continuous learning, training, and development opportunities. We're excited about cultivating our organization's future leaders and make it a priority to promote from within.

Managers and Mentors

With both a manager and mentor in your discipline, you will get clear direction, powerful support, and real feedback on your ideas. They'll help you understand the purpose, scope, and goals of your projects, guide you in making decisions, and provide all you need to see your projects through from start to finish.

Support and Collaboration

Our teams continually push the limits of what is possible in a work environment that brings out the best in everyone. You'll collaborate with the world's brightest minds, leveraging your collective brainpower to solve challenges others deem impossible. Whether working from our technology centers or attending global technology forums and symposiums, you'll be at the forefront of progress.

Cutting-Edge Technology

Our teams' solutions shape operations in one of the world's most dynamic industries. In our global technology centers, you'll apply the latest technologies in a creative environment where breakthroughs flourish. From the Industrial Internet of Things (IIoT) to machine learning to advanced cloud computing, our teams explore all the digital forces shaping our world.

Sustainability

What we do has an impact on the industry, business, and people. While helping customers produce oil and gas more efficiently, we aim to positively impact the people inside and outside the industry, developing the energy that moves our future.

Diversity

With more than 90 technology centers around the world, we treasure a diversity of perspectives, expertise, and backgrounds. Every team member plays a part in shaping the future of oilfield services.

Training and Development Program

We provide all the training you need to advance quickly within your role and realize your full potential. Our training and development program is flexible and agile, designed to support your growth as you contribute to your team and key business goals. Because every team member brings unique strengths, our program blends personal development, on-the-job training, and business and managerial courses with training specific to your discipline.

How We Hire

Apply

Find a role that sparks your interest and apply at careers.slb.com. We recruit year-round for open positions.

Interview

We want to learn more about you and your goals. We'll discuss your academic background, skills, and approach to a range of challenges as we share our passions for the future of our industry.

Second Interview

Meet members of the team, work in a group, and tour a facility.

Offer

If you're successful, you will receive a letter of employment directly. Once you accept in writing, you're ready to start making your mark at Schlumberger.

Develop the Next World-Changing Technology. Apply Today.
