

Coffee at a Glance

Active in the coffee business for over 30 years, LDC offers all major Arabica and Robusta coffee qualities, serving a diverse range of customers across the globe - from specialty roasters to multinational food companies.

Relying on effective market and operational risk management capabilities, we manage key international coffee flows, from producing countries in Latin America, Africa and Asia to traditional consumer markets in the US, EU and Japan, as well as to emerging and producing countries where coffee consumption is rapidly rising.

By continuing to expand our global origination footprint, we are able to offer our customers a complete range of qualities and origins, as well as various supply chain solutions downstream, including warehousing, logistics and value-added services.

We are also meeting rising demand for roaster-specific grades, and traceable and sustainable supply chains.

Thanks to our team of sustainability specialists, dedicated to improving our suppliers' farming practices, we have significantly increased our capacity to originate sustainable, traceable coffee. Through our specialty trading unit *Zephyr Coffee Merchants*, we also source and offer select coffees to growing gourmet and specialty markets worldwide.

Our Value Chain

We develop sustainable solutions to bring agricultural goods from where they are grown to our customers' doorstep. This involves a complex supply chain in which our people and partners play a vital role, ensuring a smooth journey for our products.
