

PAN-UNITED CORPORATION LTD

- Biggest concrete and cement company in Singapore, with operations in Vietnam, Malaysia and Indonesia
- Over 1,200 employees

VISION

To be a technology company in concrete and logistics

GLOBAL LEADER IN CONCRETE TECHNOLOGIES

Through world-class research and development, we have created over 300 different types of specialised concrete products. They include:

- **Underwater Concrete** for bridges and dams
- **Lightweight Concrete** for roofings and earthquake-proof structures
- **Flexible Concrete** for airport runways
- **Green Concrete** for sustainable structures

- **Self-Compacting Concrete** for subway stations
- **Radiation-Shielding Concrete** for proton therapy facilities to treat cancer patients
- **Temperature-controlled Concrete** for skyscrapers and underground structures

THE CONCRETE INNOVATION LEADER

PanU's Innovation Centre for research and development of specialised concrete products and Command Centre for advanced logistics are among the world's best, ensuring operational excellence in our product delivery.

TRANSFORMATION INTO A TECHNOLOGY COMPANY

PanU has evolved beyond brick and mortar to become a highly digitalised organisation deploying IoT, data analytics, machine learning, AI and cloud technologies.
